) But if you are not familiar with the world of computational linguistics, then that explanation might seem like I'm speaking a foreign language.. I manage the team responsible for gathering and analyzing data, which is used for the development of natural language machine learning (e.

People often ask me, "What is it that you do for work?" and depending upon how well I know the person my answer can vary quite a bit.. Therefore, I will take a step back and give a higher-level overview of what exactly linguists like myself at Applica do all day in order to shed some light on this fascinating, but often misunderstood field.. g : language models, named entity recognition, information extraction, classification, etc.
